

Product Features

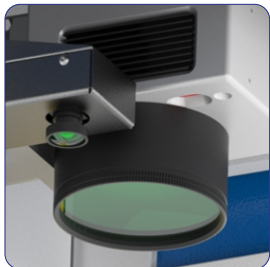

- 5W UV
- High precision optics
- Auto focus
- Built in exhaust fan
- Rotary ready

Safety Features

- Open cover protection
- Status lamp
- Emergency stop

Our Support

- NZ-wide backup & support
- 24 month warranty on parts

7000mm/s Speed
The galvanometer motor provides stability, accuracy and fast marking speed.

Protective Windows
Tempered glass viewing windows

Emergency Stop

AURORA 8 UV

NZD **\$20,500.00**+gst

Auto Focus
Precision optics to achieve a fast and precise focus.

Lightburn software
Better software for laser cutters.

Rotary Capabilities
With an added rotary you can engrave cylindrical items.

Thunder Laser New Zealand offers high quality machines with after sales support for parts and service.

The Thunder Laser Aurora 8 UV is a high-precision fibre laser engraver, excelling at intricate engraving on glass and crystal, as well as detailed marking on metals and select plastics. Designed for industrial use, it offers reliable performance and effortless operation.
